

SPRAY-ON SNOW ART

This at-home activity is provided by Calgary Public Library to help you and your family have a fun and engaging winter together, both at home and out in the community.

Enjoy this simple, hands-on activity to create art in the snow.

MATERIALS TO FIND AT HOME

- Warm water
- More spray bottles (optional)
- Kool-Aid packet
- Bottle
- Spray nozzle

ACTIVITY INSTRUCTIONS

1. Add one packet of Kool-Aid to the bottle.
2. Fill the bottle with warm water. Screw the spray nozzle onto the bottle.
3. Shake the bottle until the Kool-Aid is dissolved.
4. Spray the colour on the snow to start your snow painting. If you don't use it all, put the rest into another container for later.
5. Take the spray nozzle off the bottle and rinse it out, then create another colour from the other Kool-Aid packet or save it for another time.

You can also try the following:

- Use food colouring instead of Kool-Aid for more snow-painting fun.
- Attach a large sheet of paper to the side of your house or fence, paint on it, then, using just water in the spray bottle, spray your painting for a cool, rain-washed effect.
